

12-10-15 Sprint 5 planning

Meeting notes

Backlog Items to do this sprint

- As a user I want to be able to choose different alarm tones
- As a user I want to be able to choose if the phone should vibrate or just play an alarm tone or both
- As a user I want to be able to interact with the program easily
- Fixing bugs
- Clean up code/Refactoring

The additional backlog items are considered an addition to the already existing MathModule and are therefore considered easy to implement and therefore the low estimated time.

The estimated time this week for all the tasks is going to be: 56 hours.

Work:

Adrian takes alarm tone related work.

Adrian, Andreas takes on gui.

Everyone works refactoring of code.

joakim and daniel works with bugs.

Work Deadline:

This week on saturday at 18:00

Sprint Review: Monday 15:00

Converted the user stories to sprint log items(see sprint log for sprint 4).
