

12-10-08 Sprint 4 planning

Meeting notes

Backlog Items to do this sprint

- As a user I want to be able to choose different alarm tasks
- As a user I want to be able to make my alarms recurring(on selected weekdays)
- As a user I want to be able to change the alarm volume
- As a user I want to be able to see in the statusbar that an alarm is set
- As a user I want to be able to turn off my alarm by completing a game of memory

Additional Backlog Items

- As a user I want to be able to turn off my alarm by completing a baseswitchproblem.
- As a user I want to be able to turn off my alarm by completing a modular problem.
- As a user I want to be able to turn off my alarm by completing a difference of two squares problem.

The additional backlog items are considered an addition to the already existing MathModule and are therefore considered easy to implement and therefore the low estimated time.

The estimated time this week for all the tasks is going to be: 56 hours.

Work:

Andreas takes statusbar

Adrian takes the alarm volume

Joakim, Daniel takes choose alarm task, recurring alarms

Joakim is also responsible for creating a memory game

Joakim also takes the additional backlog items

Sprint Review: Monday 15:00

Converted the user stories to sprint log items(see sprint log for sprint 4).
