

# Retrospective notes

## *Sprint 2*

**Did we improve on the things we said we needed to improve?**

“

1. *Keep to the time limits for the meetings*
2. *Have an agenda prior to meetings*
3. *Have daily scrums during lunch*
4. *Improve coding-discipline - need to organise ourselves and code together*
5. *Better communication within team, we need to know who is doing what*

“ - Quote from Sprint 1 Retrospective

1. Sticking better to the topic and keeping to the time limits.
2. Better knowledge of what to say and do during the different scrum meetings.
3. Can still be improved, trying to set a place for the meeting every day: The hallway of Hubben.
4. Better, but can still be improved a bit.
5. Much better, all know what to do and what the other does.

**What went well this sprint?**

- We got a lot more done and things went more smoothly in general.
- We kept to the topic and time limits at scrum meetings
- Communication between teams and team members was better
- Coding discipline was better but can be worked on

**What didn't go well?**

- The development effort was badly distributed and resulted in some team members having less to do.
- When a team member was done with his share of the development effort for the sprint they didn't do anything else.
- Daily scrums weren't strictly adhered to and/or were non existent some days.

**What can we change so we can do a better work next sprint?**

- Distribute the workload better at the sprint planning
- Team members who complete their work need to take initiative and work on other things
- Daily scrums:
  - Pre-determined place and time
