

Review notes

Sprint 3

Accepted items in backlog:

- As a user I want to be able to turn off my alarm by completing an exciting task
- As a user I want to be able to edit an alarm
- As a user I want to be able to remove an existing alarm
- As a user I want to be able to disable an alarm

Unaccepted items in backlog:

Demo:

The current application can now set multiple alarms, browse/edit/disable/remove those alarms, show a new activity (with an exciting task!), start sound and vibration when one of those alarms activate, shut off the alarm that activates when the task is completed (previously by button press, now via math solutions).

Additions to MathModule from implementation meeting:

In addition to the addition and multiplication module, we also added an problems for fibonacci, prime numbers and factorial problems.

Notes:

The model unit tests covers 100% of the module code(logic code) see the coverage report at: jenkins.pepparkakan.net
Also no findbugs issues.
